LARAVEL DEVELOPER

Laravel developer with 2+ years of professional experience, in **Japan** based company, building and maintaining scalable, testable, and optimized web applications. Skilled in Laravel 8–11, MySQL/PostgreSQL, RESTful APIs, and modern PHP practices. Hands-on experience with real-world projects involving authentication, API integration, and complex business logic. Strong advocate of clean code, test-driven development, and performance optimization.

CORE SKILLS

- Backend Development: Laravel (9–12), Livewire, RESTful API design, PHPUnit testing
- Frontend: React, Next.js, Blade, Alpine.js, jQuery
- Databases: MySQL, PostgreSQL, database indexing, query optimization
- Testing & TDD: PHPUnit, feature tests, factories, seeders, assertions, mock objects
- Tools & Workflow: Git, Composer, Artisan CLI, CI/CD basics, Docker (familiarity)
- Other: Payment gateway integration (Stripe and Rakuten Pay), API authentication (Sanctum), SEO
